Final evaluation: A (95-100 points)

Evaluation, comments, recommendations of the thesis advisor:

From a methodological aspect, the work has a logical framework, the topic is sufficiently and clearly specified, the set of goals are realistic, and the chosen methods are adequate. When describing the process of inquiry, there is a lack of information about the chosen approach to data analysis.

The author of the bachelor's thesis used enough appropriate domestic and foreign literary sources.

Alignment of text and indentation of new paragraphs would make the text more visually readable. The style and text structure of the text are clear and logical. Scope and proportionality of content are appropriate and correct.

The author's approach was systematic and delved deeply into the topic, despite existing objective obstacles.

The author of the bachelor's thesis addresses a highly topical issue through qualitative methodology. Although it is localized in Slovakia, countries such as Singapore are also attempting to cope with similar problems. The topic is highly relevant, and the author approached it comprehensively. He brought valuable conclusions, especially in terms of what needs to be changed.

I recommend this thesis toward bachelor thesis defense in June 2023.
