**Evaluation, comments, recommendations of the thesis advisor:**

The thesis presented by Lucia Kobzová far surpasses requirements for a bachelor's thesis. It offers an in-depth analysis of legal and institutional framework for e-government, substantiated by a thorough review of legal acts and policies in place. The thesis is backed by first-hand experience from several internships and consultations with experts that elevate the thesis to the level of expert policy analysis. The thesis offers important findings – especially that there is a significant communication gap between legal experts and IT experts, and also that the main challenge in making our e-government more effective is institutional culture, including poor services to the public, lacking education of staff tasked with implementation of e-government services and of the end users. I do hope that Lucia Kobzová will share her thesis with the consulted experts, and I would also recommend a shorter version of this policy analysis for an academic journal publication.

I recommend – do not recommend this thesis toward bachelor thesis defense in June 2023.
